

Toyota Forklift Attachments

Attachment for Toyota Forklift - In the United States, Toyota Materials Handling inc., or TMHU, has been the top selling lift truck provider since 1992. This company has been headquartered out of Irvine, California for well over 40 years, providing a wide-ranging line of quality lift trucks. With a remarkable reputation of stability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the keystone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are manufactured here.

All Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its commitment to continual progress, and its environmental methods. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift trucks emit 70 percent less smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, associates Toyota's accomplishment to its robust dedication to manufacture the best quality lift vehicles while delivering the utmost customer service and assistance. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's leading lift truck provider and is among the magazines impressive World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an exceptional company ideology towards environmental management within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability can not be matched by other organizations and unquestionably no other materials handling producer can thus far rival Toyota. Environmental accountability is a fundamental feature of company decision making at Toyota and they are proud to be the first and only maker to offer UL listed, EPA and CARB certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more intricate 2010 emission standards. The end creation is a lift truck that creates 70% less smog forming emissions than the present Federal standards allow.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its commitment to the environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and community parks that were damaged by fires and other ecological causes. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's network of dealers to non-profit organizations and local consumers to help sustain communities all over the United States

Industry-Leading Safety

Toyota's lift trucks offer enhanced stability, visibility, productivity, ergonomics, and all the leading safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps lessen the chance of accidents and accidental injuries, and increasing productivity levels while minimizing the potential for merchandise and equipment damage.

System Active Stability can discern factors that may lead to lateral volatility and potential lateral overturn. When any of these factors have been sensed, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This transitions the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding stability.

The SAS systems were originally adopted on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped propel Toyota into the lead for industry safety standards. Now, SAS is utilized on virtually every modern internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker training, overturn fatalities across all models have decreased by 13.6% since 1999. Also, there has been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's rigid values continue far beyond the machinery itself. The company believes in offering extensive Operator Safety Training courses to help clients satisfy and exceed OSHA standard 1910.178. Education packages, video lessons and a variety of materials, covering a wide scope of topics from individual safety, to OSHA rules, to surface and cargo conditions, are offered through the supplier network.

Toyota's Dedication to The U.S.A.

Toyota has sustained a continuous existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, produced its 350,000th lift truck. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in

America today are manufactured in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of property. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the total commitment exceeding \$113 million dollars.

The new NCC was designed to serve TMHU buyers and dealers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and finally a education center.

Leader in Client Service and Satisfaction

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most complete and inclusive customer support and customer service in the industry. The company's new and Licensed Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to guarantee overall consumer satisfaction.
